BACKGROUND

SASA GROUP RWANDA Limited is a registered Rwandan Private Security Company since 2016. Located in Nyarugenge District.

It is to provide a fully security solution to individuals, business, and community. Built on the premise that security and safety in our country is from downward spiral.

We strive to be the major contributing factor in private security services. Our value of integrity, teamwork, attitude, performance, ethic and passion were carefully chosen and form the framework for our commitment to outstanding customer services as well as guiding our daily action.

We have made significant investment in technology to ensure both our international and external processes deliver outstanding customer services and real time information.

We train youth in the area of firefighting, fire prevention and rescue so that this can be a professional for them and after training they can be useful to the society not only in Rwanda even at the global standards with the support of our government.

Sasa group Rwanda ltd was founded by Rutagengwa safari after working in firefighting sector for 7 years in France. Coming back home he found the gap in firefighting and first aid sector so sasa group Rwanda was born in 2016.

Though the company was registered by then, full operations didn't start right away, it started later in 2019 with only 10 employees.

It's services being only four services which were leasing and renting ambulances, first aid and fire safety.

Post covid-19 the company extended its services to first aid and fire safety trainings, match and event interventions, selling fire safety equipment, selling first aid kits, refilling of fire extinguishers and installation.

This growth brought in the increase in staff where it went from employing 5 people to 54 as of now.
